Your Responsibilities – You will grow

- You'll design visual content for our website and social media channels and ensure a consistent, recognisable brand identity.
- You showcase our products and technical solutions using high-quality 3D renderings, animations and motion graphics.
- You plan and carry out product and corporate photography as well as video productions, including editing and post-production.
- You contribute your own creative ideas, develop new concepts together with the team and actively help shape our brand identity.

Your Profile – How You'll Move Us Forward

- You have completed an apprenticeship or a degree in graphic design, media design, communication design or hold a comparable qualification.
- You have a sound knowledge of layout, design, typography and image editing. You are proficient in Adobe Creative Cloud, particularly Photoshop, Illustrator and InDesign.
- You have experience in photography and video production, and ideally in 3D rendering and motion design.
- You are interested in technical aspects and enjoy familiarising yourself with new topics.
- You are creative, have a good eye for visual language and design, and enjoy contributing your own ideas.
- You work independently, in a structured and reliable way, and value close collaboration within a team.
